Prepared by  
Susanne P. Lajoie, Chair  
Selma Abu-Merhy, Administrative Officer  
Dean Thomson, Secretary to the Chair and Department

### **Section I: Departmental Objectives**

The Department of Educational and Counselling Psychology (ECP) is a scholarly and professional community whose mandate is to advance scientific knowledge and practice in education and psychology from both a research perspective that advances theories in this field as well as an applied perspective that informs practice in the community. Strong interdisciplinary partnerships exist in this department that extend internationally. Our research and teaching themes fall under an umbrella of: Learning, cognition and development in typical and atypical populations

### **Section II. Highlights of the Past Year**

- The Department welcomed two new faculty members, Dr. Martin Drapeau, in Psychotherapy Process research and Dr. Jeseon Park, in the area of multicultural issues and diversity in counselling psychology. These two professors are working closely with Dr. Jack de Stefano, Dr. Marilyn Fitzpatrick and the rest of the Counselling Psychology program toward a CFI proposal that will transform the Counselling Clinic into a state of the art research centre and clinic.
- ECP's nomination was accepted that Dr. Joseph Renzulli (from the University of Connecticut) receive an Honorary Doctorate from McGill University.
- Research productivity in publications and grants has increased to an average of 3

become leaders in the field of health sciences education, through conducting educational research, educational administration, and or curriculum development. It will be of equal interest to educational psychology graduate students wishing to specialize in health education. The revision of course requirements in cognition and instruction will facilitate student progress through the program and provide a more coherent course curriculum. There will be an elimination of the minor as a program requirement, replaced by concentration options. There is also a planned reduction in course load and an integration of the comprehensive exam preparation with a course sequence that will make it more conducive to efficiency

promoting a close integration of the Inclusive Education option with the rest of the BEd programs. Another contribution to the BEd is through ECPs courses in areas of assessment. ECP and DISE are in the process of recruiting a joint hire that crosses both departments, in the area of cognition and assessment so that future teachers would benefit.

**B –Students (undergraduate and Graduate) and their success**

Table 1 indicates that 57% of our Full-time students are funded at an average rate of \$4354. The department and faculty research grants account for 40% of their funding, the university graduate faculty provided 6% of this funding and the 11% are funded by external fellowships. ECP students have a high rate of success at obtaining external fellowships and would obtain more if they were available. ECP graduate students are very active in presenting their research at conferences. Dominique Morisano, a Masters student won a APA/COGDOP award and 5 MEd students received a Butters Foundation award. Lisa French, a PhD student won a Faculty Scholarship, the Victor Herschel award this year and Andrea Bryne was awarded one for the upcoming year.

Table 2 provides the ECP headcount of undergraduate enrollment by certificates and diplomas that predominantly consist of professional education for teachers. The enrollment level is highest in the Certificate for Inclusive Education and its growth in the Inclusive Education certificate is due in large part to the expanse rate 002 Tc -0.0002 Tw -22.02 -1f-cess -0.0

applications to our programs. Our registered to accepted /ratio has

staff, adjuncts, associate members and course lecturers as well as non-academic staff is found in Appendix IV. ECP was contacted by the Chair of the Physics Department and asked to consider a spousal hire to support recruitment of a professor in their area. An ad hoc hiring committee was formed, with members from ECP and DISE, and an offer was made. Unfortunately, a higher offer was accepted by both parties at another institution.

### **E- Involvement in the community**

Researchers in ECP are greatly involved in the community in both educational and clinical settings. Many of our students are placed in educational settings to work in areas pertaining to school based assessments that can lead to better learning outcomes for students encountering difficulties, be it disabilities or emotional and/or behavior problems. Many of these students are later hired as School Psychologists. ECP deals with individuals from both typical and atypical populations and much of its community involvement is with children and adolescents who are at risk
